

THE CART SYSTEM IS PROVEN AND PREFERRED. HOW DO WE KNOW? YOU TOLD US!

Perhaps you should consider changing over to one big blue cart with a lid like Brampton did.

STEPHANIE

County of Simcoe, we need bigger green bins!

ANDREW
Facebook

Wheeled bins are so much easier than carry bins.

BEV
Facebook

I support the larger bins. It's been a long time coming... Large families can end up with up to 6-8 recycling bins every other week.

MIKE
Facebook

I personally love the larger bins. And I have a long, gravel driveway. The smaller bins take lots of work bringing them back and forth.

GET ROLLING...

- Starting November 1, roll out carts on your new collection day by 7 a.m. The new collection schedule will be communicated in fall 2021. Please note collection times will vary for several weeks as routing is optimized
- Place carts on level surface within eight feet of the travelled portion of the road, avoiding low-hanging branches
- Face the front of the carts toward the street and handles toward your house
- Do not overstuff carts, fill loosely, ensure lid is fully closed
- Do not use bungee cords or other items to keep the cart lids closed

FOLLOW THE RULES OF 2

- ✓ Roll out 2 carts weekly
- ✓ Keep 2 feet apart
- ✓ Keep 2 feet from other objects
- ✓ Point 2 arrows toward the street

NEW AUTOMATED CART COLLECTION

Rolling out to Simcoe County curbs November 1, 2021

INFORMATION GUIDE

carts.simcoe.ca

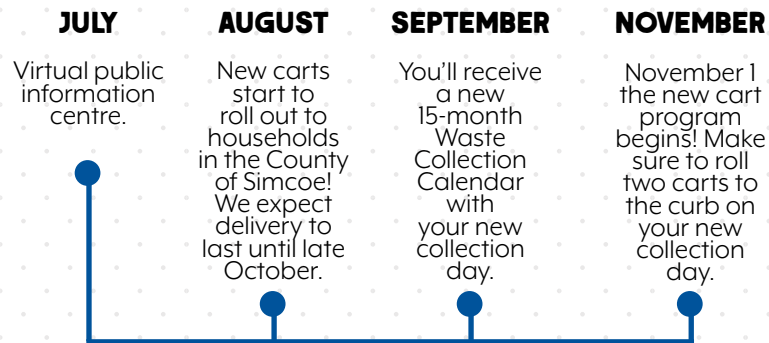

THE NEW, EASY AND SAFE SOLUTION TO CURBSIDE WASTE COLLECTION STARTS NOVEMBER 1

The County of Simcoe is joining leading municipalities across North America in utilizing an automated cart system starting this November 1. Eligible residents and businesses will receive three new carts for garbage, recycling and organic materials between August and October. Your current recycling and green bins can be brought to a County landfill free of charge after November 1, or you may wish to utilize them for other storage purposes.

SO MANY BENEFITS!

- On average, vertical carts use up to 50% less floor space to store an equivalent volume of waste
- Consolidate a variety of smaller bins, bags, and containers into three carts
- Cut down on lifting and trips to the curb; roll just two carts to the curb each week
- Better for the environment with more room for organics
- Lids on all carts protect against windblown litter and impacts from critters
- Safer for everyone with touchless automated collection
- Carts improve collection service, reducing potential for collection misses and impacts

COMING SOON TO A CURB NEAR YOU

EASY TO ROLL!

THE RIGHT SIZE

Cart sizes were selected to meet the needs of the average County household, provide more vertical storage space, and help grow the organics program. More information is available at carts.simcoe.ca.
